

# URF GAMES

## Quick Guide

This android app allows you to see the recent Ultra Rapid Fire games of League of Legends. When the app is installed, you can easily run it by clicking the URF Games icon in your applications menu. Then, you will see something like this:

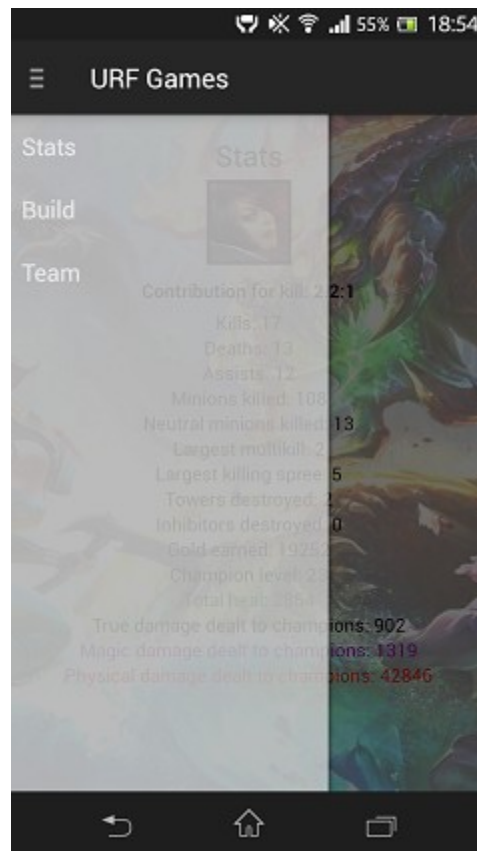

Those are the recent URF Games of your region – at least of the default region (EUWest). Make sure you configure the app in your region by checking the “region” menu.

You can tap any item of the list of recent matches, to see this:

There you can see the KDA of every summoner and their leagues. But that is not everything! The images of the champions are buttons, so you can use them to see their detailed statistics:

And you can check stats of the player, the items built and some things about his/her team.
